# FUN FACTS About NATIONAL PARKS

There are over  
6000 national  
parks around  
the world!

That's about 149  
million square  
kilometres!

The Lake District  
National Park covers  
about 1 percent of all  
the land area in England  
and includes Lake  
Windermere, the largest  
lake in England. The  
Lake District is one of  
the most-popular  
tourist destinations in  
England.

Crater Lake  
is the  
deepest  
lake in the  
United  
States at  
1,932 feet.

The busiest  
national park is  
Yellowstone  
National Park  
with  
approximately 4  
and a half  
million visitors  
a year!

National parks  
often allow  
protected  
species, such as  
Alpine ibexes, to  
flourish.

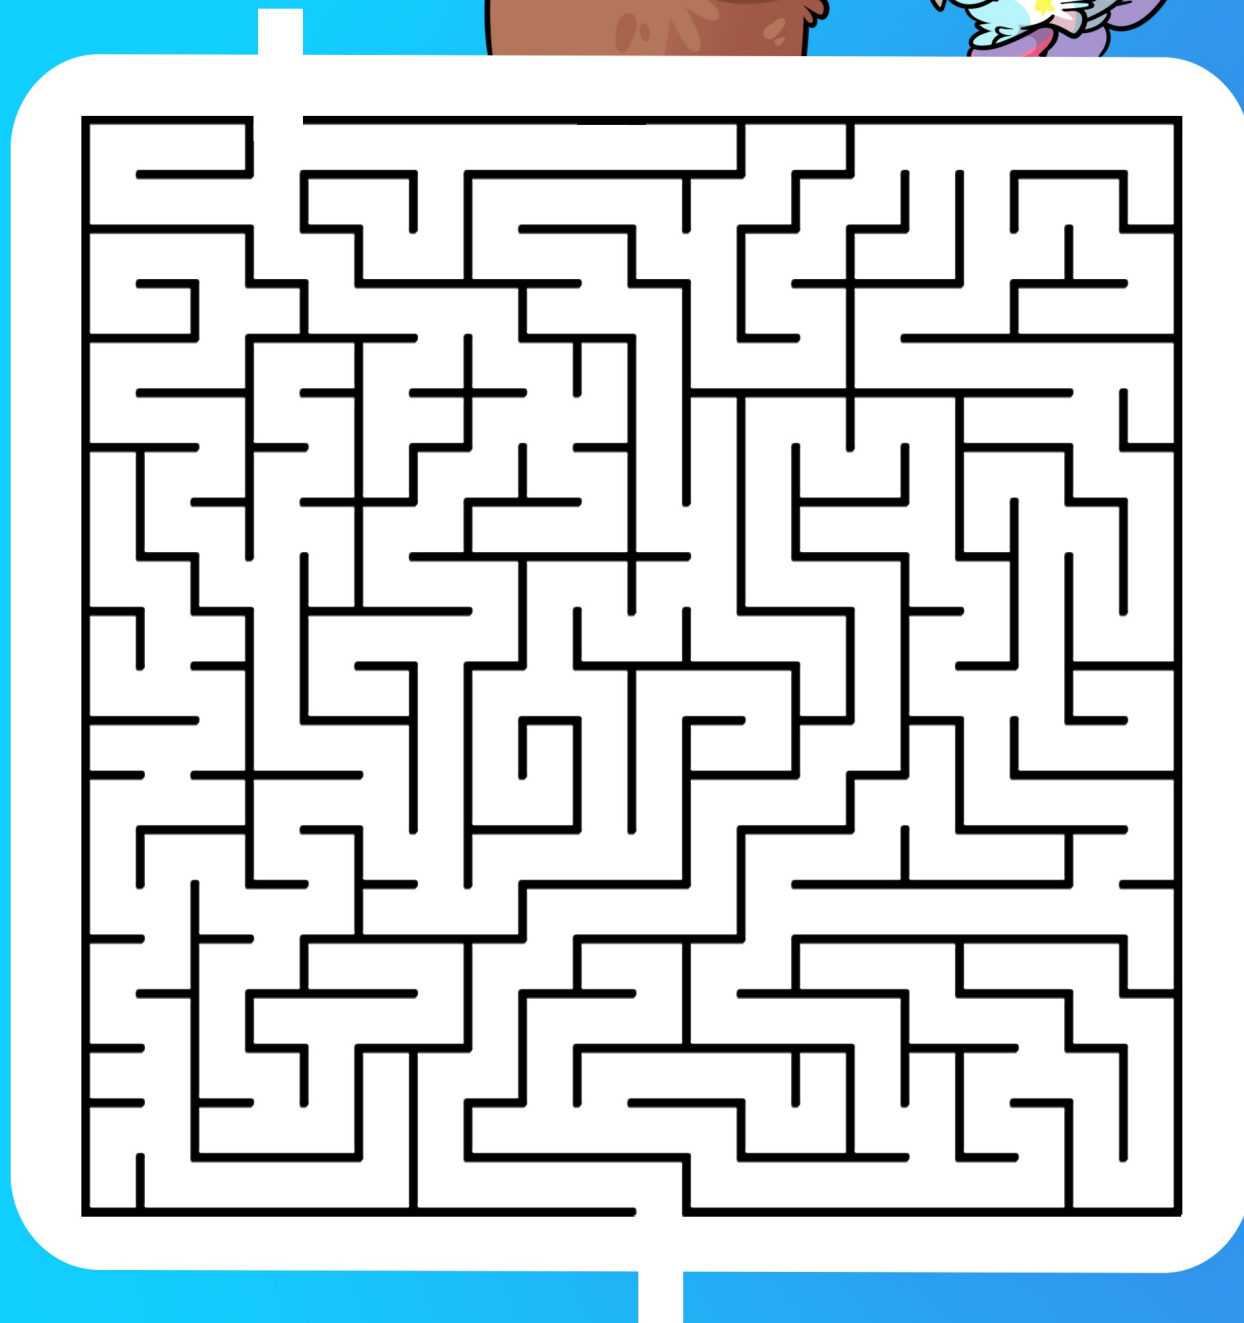

# SPOT THE DIFFERENCE

Can you spot the 7 differences in the pictures below?

Looks like it's time  
for Bigfoot to go  
home. Can you  
show them the  
way?

**FAREWELL...**

**THEY MADE IT!**

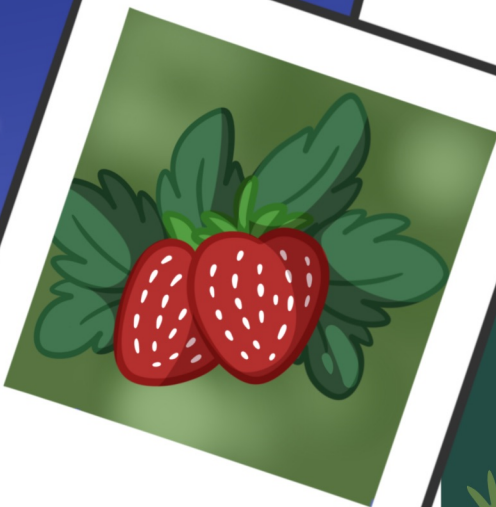

# STORY TIME!

The group are telling ghost stories around the campfire! As our newest member, why don't you tell us your scariest ghost story?

If you don't feel like writing, draw the scary story!

**Wow! that sure was the scariest story I ever heard. Hey, I took some photos earlier today, can you help me label them?**
